Balance

Lunar echo Material in soft texture, resistant and full of nuances, with great technical properties. As if the moon itself had poured its essence on our ceramic designs, Balance becomes a testimony to the beauty that emerges from calm and serenity. With a texture in soft relief, achieved through the application of granules, Balance acquires a material aspect, full of nuances and capable of captivating your senses. Balance weaves a delicate and serene movement in the background, with small inlaid stones, giving authenticity and naturalness to each design. The collection is inspired by authentic stones such as limestone, porphyry and sandstone. Each tile tells the story of a landscape sculpted by the passing of millennia, peaceful. This porcelain tile does not skimp on design or strength. Its C2 and R10B resistance classification and, at the same time, its smooth texture anti-slip properties, make it ideal for floor coverings in large surfaces, transit spaces, covered outdoor spaces and even wet areas such as kitchens, gyms or laboratories. The design of Balance, with its stony and harmonious appearance, flows with continuity, creating an endless effect in large spaces. A perfect balance between nature and innovation in 90x90, 60x120, 60x60 and 30x60 modular formats and 9 mm thickness for large projects. The collection is combined with Suite Balance, a series of decorative relief pieces in white body 30x90 format, which recreate the appearance of chiselled stone with delicate parallel grooves on the Balance surface.
