Marble Dolomita

Redefines the beauty of marble. Subtle and elegant technical marble of serene elegance. Dolomita is serene elegance, a true reflection of natural stone with all the advantages of a high-tech material. The subtle and elegant appearance of this technical marble is achieved through a very refined working and refining process, which gives it an ethereal and deeply tempered base. The bright copper veins in the foreground give it original and sophisticated nuances, while in the background, the faint grey veins fade into the pearly white, soft and lustrous, creating a surprising and harmonious visual effect. The Dolomita marble finish is of exceptional quality, with a smooth and uniform texture that is inviting to the touch. The collection achieves its magical realism in matt, in the rectified formats: 60x120 and 90x90 and in a new large format 120x120, which makes it a perfect choice for those seeking the authenticity and veracity of natural marble, without compromising the quality and durability of their project. In decorative porcelain, in 30x60, Suite Marble Dolomita Matt bathes the surface with parallel grooves, like stone chiselled on the marble background, inviting to the touch. The subtle, soft lines unfold elegantly, lending a touch of dynamism and freshness to interior spaces. Lose your gaze in its nuances, its luminosity and its balance.
